RED MILE MINERALS CORP.
(formerly Red Mile Capital Corp.)
NOTES TO FINANCIAL STATEMENTS
FOR THE PERIODS ENDED JUNE 30, 2010 AND 2009
Unaudited
Prepared by management

Note 1 NATURE OF OPERATIONS

Red Mile Minerals Corp (the "Company") was incorporated under the Business Corporations Act of Alberta on May 31, 2007 as a Capital Pool Company ("CPC") as defined by Policy 2.4 of the TSX Venture Exchange (the "TSXV"). Effective February 17, 2010, the Company changed its name to Red Mile Minerals Corp. During the period, the Company completed its Qualifying Transaction by acquiring from Russet Lake Resources Inc. all of Russet Lake's interest in the option to acquire a 100% interest in the Blue Quartz gold property located in Beatty Township, Ontario. See Mineral property, Note 9. Effective January 19, 2010 the Company is no longer considered a capital pool company.

The Company incurred a net loss of \$204,374 (2009: \$36,055) for the period ended June 30, 2010 and had an accumulated deficit of \$614,827 (2009: \$236,280) at June 30, 2010 which has been funded primarily by the issuance of equity. The ability of the Company to continue as a going concern is uncertain and is dependent upon the ability of the Company to obtain additional financing. In the event the additional financial support is not received, the carrying value of the Company's assets may be adversely affected.

These financial statements do not give effect to adjustments that would be necessary to the carrying amounts and classifications of assets and liabilities should the Company be unable to continue as a going concern.

Note 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The financial statements of the Company are prepared in accordance with Canadian generally accepted accounting principles.

Cash and cash equivalents

The Company considers all highly liquid instruments with a maturity of three months or less at the time of issuance to be cash equivalents.

Term deposits

Term deposits consist of highly liquid short-term interest bearing securities with a term to maturity of greater than three months on the date of purchase.

RED MILE MINERALS CORP.
(formerly Red Mile Capital Corp.)
NOTES TO FINANCIAL STATEMENTS
FOR THE PERIODS ENDED JUNE 30, 2010 AND 2009
Unaudited
Prepared by management

Note 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Financial instruments

The Company classifies financial assets and liabilities as held-for-trading, available-for-sale, held-to-maturity, loans and receivables or other financial liabilities depending on their nature. Financial assets and financial liabilities are recognized at fair value on their initial recognition, except for those arising from certain related party transactions which are accounted for at the transferor's carrying amount or exchange amount in accordance with the Canadian Institute of Chartered Accountant ("CICA") Handbook Section 3840 - Related Party Transactions.

Financial assets and liabilities classified as held-for-trading are measured at fair value, with gains and losses recognized in net income. Financial assets classified as held-to-maturity, loans and receivables, and financial liabilities other than those classified as held-for-trading are measured at amortized cost, using the effective interest method of amortization. Financial assets classified as available-for-sale are measured at fair value, with unrealized gains and losses being recognized as other comprehensive income until realized, or if an unrealized loss is considered other than temporary, the unrealized loss is recorded in income. The Company has elected to account for transaction costs related to the issuance of financial instruments as a reduction of the carrying value of the related financial instruments.

The Company classifies its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Stock based compensation

The Company applies the fair value method to stock-based payments to all awards that are direct awards of stock, that call for settlement in cash or other assets or are stock appreciation rights that call for settlement by the issuance of equity instruments. Compensation expense is recognized over the applicable vesting period with a corresponding increase in contributed surplus. When the options are exercised, the exercise price proceeds together with the amount initially recorded in contributed surplus are credited to share capital.

Future income taxes

The liability method of tax allocation is used in accounting for income taxes. Under this method, future tax assets and liabilities are determined based on differences between the financial reporting and tax basis of assets and liabilities, and measured using the substantially enacted tax rates and laws that will be in effect when the differences are expected to reverse. The effect on future tax assets and liabilities of changes in tax rates is recognized in income in the period that substantive enactment occurs.

(formerly Red Mile Capital Corp.)
NOTES TO FINANCIAL STATEMENTS
FOR THE PERIODS ENDED JUNE 30, 2010 AND 2009
Unaudited
Prepared by management

Note 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Loss per share

Loss per share is computed by dividing net loss by the weighted average number of common shares outstanding during the period. Diluted earnings per share is calculated by adjusting the weighted average number of common shares outstanding using the treasury stock method, to reflect the potential dilution of securities that could result from the exercise of "in the money" stock options and warrants.

Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. A significant area requiring the use of management estimates relates to the valuation of stock-based compensation and future income taxes. Management believes that the estimates used are reasonable and prudent; however, actual results could differ from those estimates.

Computer software

Computer software is recorded at cost, including betterment and renewals subsequent to acquisition, less accumulated amortization. When computer software is sold or abandoned, the recorded costs and related accumulated amortization are removed from the accounts and any gains or losses are included in the determination of net earnings. Amortization is calculated using the straight line method over a period of two years.

Note 3 RECENT ACCOUNTING PRONOUNCEMENTS

In January 2006, the CICA Accounting Standards Board ("AcSB") adopted a strategic plan for the direction of accounting standards in Canada. As part of that plan, accounting standards in Canada for public companies will converge with International Financial Reporting Standards ("IFRS"). On February 13, 2008, the AcSB confirmed that the standards will become effective for all publicly accountable enterprises in interim and annual financial statements for fiscal years beginning on or after January 1, 2011. The Company continues to monitor and assess the impact of convergence of Canadian generally accepted accounting principles and IFRS.

In January 2009, the CICA issued Section 1582, Business Combinations, which replaces former guidance on business combinations. Section 1582 establishes principles and requirements of the acquisition method for business combination and related disclosures. The Section applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 2011 with early adoption permitted.

In January 2009, the CICA issued Section 1601, Consolidated Financial Statements, and 1602, Non-controlling interests, which replaces existing guidance. Section 1602 provides guidance on accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. These standards are effective on or after the beginning of the first annual reporting period on or after January 2011 with earlier adoption permitted.

RED MILE MINERALS CORP.
 (formerly Red Mile Capital Corp.)
NOTES TO FINANCIAL STATEMENTS
FOR THE PERIODS ENDED JUNE 30, 2010 AND 2009
 Unaudited
Prepared by management

Note 4 ADOPTION OF NEW ACCOUNTING STANDARDS

On January 1, 2009, the Company adopted the following provisions of the Canadian Institute of Chartered Accountant's ("CICA") Handbook Sections. There was no material impact on the Company's financial condition or operating results as a result of the adoption of the following standard:

Section 3862 - In June 2009, the CICA amended Section 3862, Financial Instruments – Disclosures. These amendments are applicable to financial statements relating to the Company's annual financial statements ending December 31, 2009. The amendments provide for additional disclosure requirements about fair value measurements of financial instruments and enhanced liquidity risk disclosure requirements for publicly accountable enterprises. The additional required disclosures are included in Note 5 of these financial statements.

Note 5 FINANCIAL INSTRUMENTS AND RISK

Financial Instruments

Under Canadian generally accepted accounting principles, financial instruments are classified into one of the following categories: held for trading, held-to-maturity investments, available-for-sale, loans and receivables and other financial liabilities. The following table summarizes information regarding the carrying values of the Company's financial instruments:

	June 30 2010	December 31 2009
	\$	\$
Cash - Held for trading	27,294	93,382
Term Deposits – Held for trading	150,000	500,000
Receivables – Loans and receivables	14,495	4,120
Accounts payable and accrued liabilities - Other financial liabilities	31,633	56,458

The estimated fair values of cash, term deposits, receivables and accounts payable and accrued liabilities approximate their respective carrying values due to their nature and short terms to maturity.

Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash. To minimize the credit risk the Company places these instruments with a high credit quality financial institution.

Liquidity Risk

The Company ensures its holding of cash is sufficient to meet its short-term general and administrative expenditures. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms. The Company does not have investments in any asset backed deposits.

Foreign Exchange Risk

The Company does not have significant foreign exchange risk as its administrative operations are all in Canadian dollars.

RED MILE MINERALS CORP.
 (formerly Red Mile Capital Corp.)
NOTES TO FINANCIAL STATEMENTS
FOR THE PERIODS ENDED JUNE 30, 2010 AND 2009
 Unaudited
Prepared by management

Note 5 FINANCIAL INSTRUMENTS AND RISK (Continued)

Interest Rate Risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market interest rates. The Company's exposure relates to its ability to earn short term interest on cash and term deposit balances at variable rates. The Company has no long-term debt and therefore is not affected by changes in long-term interest rates. With respect to interest rate risk management, the Company is at risk to open market fluctuation in interest rates.

Note 6 CAPITAL DISCLOSURE

The Company's objectives when managing capital are to pursue and complete the identification and evaluation of assets, properties or businesses with a view to acquisition or participation in a qualifying transaction, to maintain financial strength and to protect its ability to meet its on-going liabilities, to continue as a going concern, to maintain creditworthiness and to maximize returns for shareholders over the long-term. The Company does not have any externally imposed capital requirements to which it is subject. Capital is comprised of the Company's shareholders' equity.

As at June 30, 2010, the Company had capital resources consisting of cash and term deposits. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares or adjust the amount of cash and term deposits.

The Company's investment policy is to invest in investment instruments in high credit quality financial institutions with terms to maturity selected with regards to the expected time of expenditures from continuing operations.

At the current rate of expenditure, the Company has sufficient working capital to meet its 2010 administrative overhead and complete its 2010 work expenditures on the Blue Quartz gold property.

During the year ended December 31, 2009, the Company entered into an agreement with Russet Lake Resources Inc. (Russet Lake) to acquire a 100% interest in the Blue Quartz gold property located in northern Ontario. Russet Lake holds an option to acquire the 100% interest subject to net smelter return (NSR) royalties of 2.5%.

During the period ended June 30, 2010, the agreement received regulatory approval and the acquisition was completed. In order to acquire this interest, the Company must:

- 1) issue 3,505,000 of its common shares (issued, valued at \$175,250) to Russet Lake at a deemed price per share equal to the discounted market price as defined in the policies of the TSX (see note 12).
- 2) assume Russet Lake's remaining obligations under the option agreement which include:
 - a) make a cash payment of \$20,000 by September 30, 2009 (paid as advance on mineral property agreement at December 31, 2009) and issue 50,000 (issued, valued at \$3,000) of the Company's common shares;
 - b) make a cash payment of \$20,000, issue 100,000 of the Company's common shares, and complete \$150,000 in work expenditures on or before September 1, 2010;
 - c) make a cash payment of \$20,000, issue 100,000 of the Company's common shares, and complete \$250,000 in work expenditures on or before September 1, 2011.

Up to an aggregate 0.5% of the NSR can be bought back for \$500,000.

Note 10 STOCK OPTION PLAN AND STOCK-BASED COMPENSATION

The Company has a stock option plan applicable to directors, officers and consultants, under which the total outstanding stock options are limited to 10% of the outstanding common shares of the Company at any one time. Under the plan, an option's maximum term is five years from the grant date. Options under this plan vest upon issuance.

During the period ended June 30, 2010, the Company issued 225,000 common stock options with a fair value of \$0.08 per option to directors, officers and consultants and stock-based compensation of \$18,000 has been recognized. The Company did not issue any options during the year ended December 31, 2009.

During the period ended June 30, 2010, the expiry date on 160,000 common stock options was changed from November 6, 2012 to February 3, 2011.

The fair value of these stock options was calculated using the Black-Sholes option pricing model based on the following weighted average assumptions:

Risk-free interest rate	2.90%
Expected life	5 years
Dividend rate	0%
Volatility	100%

The following stock options were outstanding at June 30, 2010:

Number of Shares	Weighted Average	
	Exercise Price \$	Expiry Date
460,000	0.20	November 6, 2012
160,000	0.20	February 3, 2011
225,000	0.10	February 4, 2015
845,000	0.17	

Note 11 RELATED PARTY TRANSACTIONS

The Company entered into the following transactions with related parties:

- during the period ended June 30, 2010, the Company paid management fees of \$23,333 (2009 - \$Nil) to a director and officer of the Company; and
- during the period ended June 30, 2009, the Company paid accounting fees of \$2,000 (2010 - \$Nil) to an entity in which a principal is a director of the Company.

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

Note 12 SUPPLEMENTAL DISCLOSURE WITH RESPECT TO CASH FLOWS

During the period ended June 30, 2010, the Company had the following significant non-cash transactions:

- a) transferred a \$20,000 advance on mineral property agreement to mineral property and deferred exploration expenditures;
- b) issued 3,555,000 common shares valued at \$178,250 as part of the Blue Quartz property agreement (Note 8); and
- c) incurred accounts payable for deferred exploration costs of \$3,133 (2009 – \$Nil).

Note 13 COMPARATIVE FIGURES

Certain comparative figures have been reclassified to conform with the current year's presentation.

Note 14 SUBSEQUENT EVENTS

During the period ended June 30, 2010, the Company entered into an agreement for internet and presentation branding. As part of this agreement, the Company will issue 120,000 shares, subject to approval by the TSX Venture Exchange.
